

Dear Patient,

Dr's Narayan and Kaushal of Porth Farm Surgery will be retiring from the practice with effect from the 31st December 2019.

Every option has been considered to keep the surgery open but due to the ongoing challenges of recruiting GPs, which is a nationwide issue, the health board have concluded that the only option is for patients to register with a neighbouring practices.

The Health Board will be writing to all patients in the next few days advising them which of the other local GP practices they can register with. This will also include information on how patients will register with a new practice and we would ask patients to wait to receive a letter from the health board before contacting any other surgery.

In the meantime Porth Farm surgery will be open as usual until December 31st and you will be able to continue to access healthcare services and request your medication until you are registered with another practice.
